6 NOV 1958

TO: [REDACTED] Director, Office of Intelligence Research and Analysis  
Department of State

FROM: [REDACTED] Mr. John G. Oliver

RE: [REDACTED] Office of Secretary of Defense, Department for Reimposition of Trade Controls

25X1A

1. I have discussed with [REDACTED] the following which is in response to your request for an OID re-  
sponse to the memorandum from Acting Secretary of Defense Quarles  
suggesting that certain multilateral embargoes be reimposed against  
Communist China.

2. The controls proposed in the OID memorandum would, we feel,  
in no way deter the present level of activity in the Taiwan Strait.  
The disposition of forces in being and of supplies accumulated through  
earlier Russian shipments of military equipment are more than suf-  
ficient to sustain the present or higher level of activity in this  
area for some time to come.

3. It is of course possible that a high level of Communist  
Chinese air activity in the Taiwan area might be reduced to some  
extent in the future by an effective restriction of tanker tonnage  
available to Communist China. China's present demand for petroleum  
fuels apparently exceeds the capability for overland supply from  
the USSR; the bottleneck is principally the Chinese rail system.  
On the other hand, even if seaborne shipments of fuel are interdicted,  
a fairly modest reallocation of existing supplies would permit the  
support of such limited action as that in the Taiwan Straits.

4. Because of limited capability of overland supply, any  
significant increase in present levels of China's demand for petroleum  
will require either charter of Western tankers or the employment of  
Soviet tankers. Even in this case it should be pointed out that the  
numbers of tankers required would not be great. For example, the

estimated probable movement of 200,000 tons of Soviet petroleum to China by sea in 1958 could have been moved in only four Soviet tankers. Of the total of 92 ships in the Soviet tanker fleet, 0-50 of them are of the type required for such voyages.

5. We think it is important to emphasize that the partial embargo of selected strategic goods could be expected to have no significant impact on Communist Chinese military effectiveness. In a controlled economy the size of Communist China's, particularly when backed by the combined economies of the rest of the Bloc, the inconvenience resulting from selected trade controls such as those proposed could be easily accommodated. The Chinese military build-up depends rather on: (1) Chinese decision to divert domestic economic resources away from other programs to defense, and (2) Russian willingness to augment Chinese resources by unregulated exports of Soviet strategic supplies.

6. The Chinese economy although growing rapidly is still relatively underdeveloped by Western standards. Nevertheless, the rate of redirection to Chinese military strength has been considerable in the past few years and may be expected to grow with increased Chinese industrial growth.

Documentation of CSC Reports

1. You will recall that we recently discussed the question of documentation of CSC reports. The objective of eliminating or reducing current documentation was to speed up the editing, typing and reproduction of these reports. There was no question of eliminating documentation through the cancellation of the review phase, or of doing away with the preservation of a file copy of the draft report adequately documented. Subsequent to the completion of the review phase, however, this documentation could be fully or partially removed. If fully removed, our CSC's P/T's, and EM's would be published in a manner similar to the SEC-214 series.

2. Documentation could be reduced by referring only to the key source references, and using textual devices to indicate origin such as, "Official Soviet announcements state that hobby pin production was 3,000,000 units in 1951."

3. Documentation could also be reduced by confining it to a brief appendix of a page or two which would discuss principal sources used in the report.

4. Will you please talk over these possibilities with your people and let me have a reply covering your views by 3 October.
